## QUOTES

- “Leaders do the right things; managers do things right. Leadership is concerned with constructive or adaptive change, establishing and changing direction, aligning people, and inspiring and motivating people. Management is concerned with consistency and order, details, timetables, and the marshaling of resources to achieve results.” Bass, 2008, p. 654
- “Do not worry about holding high position; worry rather about playing your proper role” Confucius
- “Although there are clear differences between management and leadership, the two constructs overlap. When managers are involved in influencing a group to meet its goals, they are involved in leadership. When leaders are involved in planning, organizing, staffing, and controlling, they are involved in management. Both processes involve influencing a group of individuals toward goal attainment.” Northouse, 2013, p.14
